## Combination Exercise - Pike - Body saw - Forearm pushup position - Group: Combination exercise

## Tags

Type of exercise: Combination exercise, Partial body exercise, Strength exercise Number of persons: One Muscle Primary: Abdominis, Arm, Leg Muscle Secundary: Butt, Shoulder, Back Difficulty: Medium Other: Dynamic, Knee height, 1 Sling

## Description

1. From the forearm push-up position, the hip is moved over the vertical shoulder axis. 2. The hip is moved back again. 3. From the forearm push-up position, the stretched body is moved backward. This increases the elbow as well as the arm-hull angle. 4. The body is moved forward again.

## Advice

Keep your legs closed during the exercise! Avoid a "hollow cross" during the execution! The practice becomes more intense the further you remove your body from the suspension point.
